

Richard Loth's
Fund Investor's Classroom
Investment Education and Insights for Individual Investors

Learning About Mutual Funds – This 15-page booklet is a guide to learning the ABCs of the fund investing process. The insights provided in this piece provide an easy-to-understand approach to becoming a fund investor. Whether you're a do-it-yourself investor or one who uses an investment professional, you need to have sufficient know-how to make informed fund investment decisions. This booklet will help you do that.

Morningstar's One-Page Wonder – Morningstar, Inc. is the premier independent investment research firm in the mutual fund field. Its evaluative single-page fund reports are widely recognized as a "must-have" tool for mutual fund investing. This 15-page booklet is an easy-to-use guide that focuses on six fundamental data-points in these reports that reveal a fund's investment qualities, or the lack thereof.

The Fund Investor's Dictionary – This 15-page booklet provides in-depth definitions of the terminology used in mutual fund investing. Because of the comprehensiveness of the 90 definitions and their extensive cross-referencing, it would be more accurate to call this Dictionary an "Explantory." The entries go beyond pure definitions in order to explain and help fund investors understand the jargon used in mutual fund literature and documentation, research reports, and the financial press.
